

Nth Degree TJ Long Arm Suspension System Generic Bill of Materials

Below is a generic list of the sub-kit products that make up a typical long arm system. Notice that some have incomplete part numbers because there are multiple versions that depend on your application as noted. Each line item is also available for separate purchase, but the full system price represents a savings versus buying them all separately (ala-carte). If you wish to purchase an incomplete/partial system, only a limited selection of items can be deleted and still receive the system discount savings - call for assistance.
